

INDIA-SWEDEN INNOVATIONS' ACCELERATOR

- A GATEWAY TO INDIA FOR YOUR BUSINESS

Can you provide innovative energy solutions for India?

India-Sweden Innovations' Accelerator supports and promotes business relations between India and Sweden. We are looking for Swedish companies with innovative solutions in the energy field who are interested to work with India.

The ISIA Programme offers Swedish companies, with innovative solutions suitable for the Indian market and a willingness to work in India, the opportunities to develop contacts with Indian industry, and work to define the right strategy for market entry. The Programme is currently looking for Swedish energy related companies with a strategic aim to search for opportunities in the Indian market, with a preparedness to meet the local demand. The Indian party is assumed to have the corresponding interest, and a willingness to partner-up on a commercial basis.

The Programme is free of charge for the Swedish companies selected for the Programme, and is co-financed by the Swedish Energy Agency and Business Sweden and supported by the Confederation of Indian Industry (CII).

A Programme to accelerate your business

The Programme offers your company the following components:

- Defining starting point and setting individual objectives for each company. This is organized by Business Sweden through a series of consultations called "Steps to ExportTM" - a proven process for preparing companies for international trade.
- Preparation and compilation of useful marketing tools for each company, including an introduction to the company in the form of video and text, published on the program web-page www.innovationsaccelerator.com; and used for communicating with various Indian counterparts.
- A first introduction of your company to India via a webinar.
- Three pre-arranged business trips to India to develop a perspective on "how to do business in India" and to develop your network of contacts and potential business partners.
- Participation in various information seminars such as possible financial solutions for small and medium sized companies to establish their business abroad.
- Examples of interesting fields: cleantech, electric vehicles, smart grids, building automation, energy efficiency, clean fuels etc.

At the end of the Programme, the ambition is for your company to have developed your own network of contacts as well as a concrete and viable business plan for the Indian market.

Strong commitment necessary for commercial success

The participating Swedish companies are expected to have a strategic intention to initiate or further increase their business in India, and thus strong commitment to the Programme. For the Swedish companies, the participation will be in the form of a structured business support program, tailored to each company's individual needs. The Swedish Energy Agency and Business Sweden will assist your company with business development support in Sweden and Business Sweden India will function as your local contact in India. The Confederation of Indian Industry works to mobilize the Indian stakeholders with an interest to collaborate with Swedish companies.

Timeframe

The process for each participating company will have a duration of around 1.5 year. The program is free of charge, but requires time on your part, both during the business trips and in-between, at home in Sweden. The time required can vary from company to company. In the preparation phase a detailed program plan will be discussed and agreed upon between your company, Swedish Energy Agency and Business Sweden. The dates for the business trips will be communicated well in advance. The Programme structure is built up around two trips annually, spring and fall.

Notify your interest in participating

The ISIA Programme organizers are now looking for companies interested in accelerating their business through exploring the enormous potentials of the Indian market. Attached is a Notification of Interest Template. The filled-out template will form a basis for the selection process for the Programme. Please, feel free to contact us by e-mail or phone for further details and clarifications, before sending in the template.

For more information about results and progress

If you wish to see what results the participating companies have achieved you will find more information on www.innovationsaccelerator.com
